DETAILED ACTION

Claims 1-52 are pending in the application.

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- Inflammatory response related to: septic shock, toxic shock, sepsis, septicaemia, pancreatitis, appendicitis, meningitis, hepatic response to toxins or viruses, angiogenesis, psoriasis, neural protection, atherosclerosis, renal tubular necrosis, wound healing, traumatic injury/tissue trauma, surgery or burns/tissue trauma.
- Activin or follistatin
- Screening for the level of protein or screening for the level of gene expression

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The above species of inflammatory responses are known in the art. See for example, septicaemia, taught by Michel et al (Clinical Endocrinology, 1998,48:413-417 cited IDS). Thus, the species of septicaemia lacks unity with the other species listed above. Further Michel et al teach a method of detecting a predisposition of the onset of an inflammatory response in a mammal comprising screening for the level of follistatin protein.

Thus, the species of follistatin and screening for levels of follistatin protein lacks unity with the other specie activin or screening for levels of gene expression, respectively.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 1-4, 6-12,13,16-20,22,24,25-36 and 38-52 are generic.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
